

EXCITING NEWS

From the Indiana Energy Saver Program!

As part of your IESP project, your unit will receive energy-efficient upgrades to help improve comfort and reduce energy use. These upgrades are designed to make your living space more comfortable while helping you save energy.

What You Need to Know

Before Installation

Please clear and organize the areas where work will be done. Don't worry, your Building Manager can help if you need assistance moving items.

During Installation

We work to complete upgrades as quickly as possible with minimal disruption to your home. While the team is working, feel free to step out of your unit or use available commons areas.

You'll receive information soon with the exact date(s) and time for your upgrades. If you have any questions, contact your Building Manager.

Discover the Benefits

Learn About the Program

These upgrades are designed to improve comfort, energy efficiency, and the overall quality of your home, helping your unit stay comfortable year-round.

Stay Informed

We'll keep you updated about what to expect and how the work may affect your daily routine.

What May Be Coming to Your Unit

Depending on your unit, you may receive some or all of the following upgrades:

- **Heating and Cooling Upgrades**

New systems to help keep your unit comfortable in all seasons.

- **New Thermostats**

Easy-to-use controls for your heating and cooling system.

- **New Energy Efficient Appliances**

More energy efficient Kitchen and Laundry appliances.

- **Air Sealing & Insulation**

Insulation and air sealing around windows, doors, and/or other areas to improve energy efficiency and comfort.

- **LED Lighting & Energy-Saving Devices**

Upgraded lighting to LED lighting to help reduce energy use.

More information about the exact upgrades coming to your unit will be included in your Rebate Work Notice, which you'll receive before work begins.

Enjoy Your Upgraded Home

After installation, your unit will be more comfortable and energy efficient.

Using Your Upgrades

If your unit receives heating and cooling upgrades:

- 1. Turn On the System:** Use the wall-mounted thermostat or controls provided.
- 2. Adjust the Temperature:** Set your preferred comfort level.
- 3. Fine-Tune Airflow:** Adjust vents or fan settings as needed for consistent comfort.
