INDIANA ENERGY
SAVER PROGRAM
Save Energy. Cut Costs.

WHOLE-HOME ENERGY IMPROVEMENTS. LOWER ENERGY COSTS.

Make your home more **comfortable** and more **affordable** to live in. The Indiana Energy Saver Program helps eligible Hoosiers lower the cost of approved energy-saving upgrades and installation.

We look at your whole home to find improvements that work together to reduce energy use and lower bills. Depending on your home's needs and your eligibility, upgrades may include insulation, sealing air leaks, heating and cooling systems, and water heating.

An energy checkup helps us create a plan for your home and budget. **One application connects you to available program support.**

SAVINGS THAT MAKE A DIFFERENCE

"Everybody I worked with through the program answered any questions I had and made sure everything was explained fully so I knew what was happening, when, and why."

Andy, Boonville

YOUR PATH TO A MORE EFFICIENT HOME

1. APPLY
Share information about your household and upload any needed documents. We'll review your application to see if you qualify.

2. HOME ENERGY CHECK
We'll look at how your home uses energy and find ways to help you save money and stay comfortable.

3. REVIEW YOUR PLAN
We'll show you recommended upgrades, available financial help, and any costs you may need to pay.

4. INSTALLATION
Approved contractors complete the upgrades for your home.

5. FINAL CHECK
We'll review the work to make sure it meets program requirements.

PROGRAM OFFERINGS
The Indiana Energy Saver Program provides two offerings through a single application process to maximize the benefits to Hoosier households.

HOME EFFICIENCY REBATE (HOMES)
The Home Efficiency Rebate Program (HOMES) provides whole-home improvements to achieve a minimum of 20% energy savings. Eligible upgrades may include air sealing, insulation, and HVAC upgrades.

HOME APPLIANCE REBATE (HEAR)
The Home Appliance Rebate Program (HEAR) supports low- and moderate-income households earning less than 150% of the Area Median Income with efficient equipment upgrades including heat pump HVAC systems, heat pump water heaters, and electrical upgrades.
